YJ Newsflash Module is Joomla 1.0.x and Jomla 1.5.x module is small but powerful Joomla extension that will amaze you with its simplicity and usability. Experienced Joomla users would say " Joomla has default one already."

But if you look at the existing Joomla newsflash module options there is not much content and intro image display flexibility.

With 13 module parameters , any Joomla admin would say simple. If you pay closer attention to Sport Line layout, complete bottom part of the demo is made from this module only! This page has 9 copies. Scroll down see for yourself.

What do you say?

Copy as many times as you like. Choose the display order. Random (refresh the page) , most popular or default Joomla news item ordering. And simply adjust the parameters to your liking.

Sure the module is XHTML and CSS Valid, SEF support for Joomla 1.0.x and Joomla 1.5.x. We also build in news item id rewrite so all news items in the module are linking to its own page.

This is a commercial Joomla extension and is available in our shop for affordable price of $20.00
